PERSONAL PROFILE

A highly motivated and detail oriented young man who enjoys problem solving and the idea of a good challenge. A tech head who's proficient in application development, whether mobile apps, web apps or desktop apps. Keith is also quite the talented designer and artist, who has had the honour of personally drawing a portrait for the First Lady of Zimbabwe, amongst other things.

My short term goal is getting a First Class Honours Degree in Information Technology and my long term ambition is in elevating the status of technology in Zimbabwe and Africa as a whole.

EXPERIENCE

- 2020 (Lockdown)
Designed concepts of new shoes (sneakers) for a startup called Academia.
- 2019
Worked for Plan International Zimbabwe, creating various artworks for a girl's rights campaign, where I also had the privilege of personally creating a portrait for the first lady of Zimbabwe, Lady Auxillia Mnangagwa.
